

COMPOSITE CO-EXTRUSION
SHEDS

FiberWood

ABOUT

We are a Canadian company committed to offer you the best composite sheds in the industry, all accompanied by an excellent satisfaction guarantee for your peace of mind.

With over 20 years of expertise at your service, our team will be able to guide and advise you in all your projects.

OUR MISSION

Allowing you to create exceptional outdoor spaces with our sheds that will withstand the weather for the very long term with very little maintenance.

OUR COMPOSITE SHED COLLECTION

Our composite sheds: much more than simple sheds!

FIBERWOOD offers a complete line of high-end composite coextrusion sheds. This very strong and durable composite is paired with our **PROSHIELD PREMIUM** protective coating which offers unprecedented protection and longevity to all our sheds. This protection covers all sides of the shed boards allowing ultimate protection against wear, stains, bumps, insects and scratches. Our **PROSHIELD PREMIUM** protection therefore allows a controlled natural discoloration of the boards in the first months of installation in their natural environment.

Therefore, our sheds are built with high quality materials that stand the test of time, which allows us to offer you a 20-year warranty on the Fiberwood composite boards.

FIBERWOOD SHEDS: THE ADVANTAGE OF OUR COMPOSITE

Being professionals in the field of composite, we have kept all the advantages in the manufacture of our boards to create great sheds:

Beauty of wood without its drawbacks. Very low maintenance.

No painting, staining or sanding required. Does not deform or swell.

Resists insect attacks.
Resists rot and mildew.

Anti-fade technology protection allows a controlled natural discoloration of the boards in the first months of installation in their natural environment.

Each board is 100% coated with Proshield Premium for ultimate protection.

Rot-proof boards, they are insensitive to humidity, rays and temperature changes.

It is impossible for moss and fungi to develop on this type of material.

An affordable price: FIBERWOOD stands out for its quality, but also for its very competitive prices. Taking into account the lifespan of the product and that it requires little maintenance, this is a very smart purchase for your projects.

Fiberwood offers a 20-year warranty on FIBER 3D boards and 5 years on the structure, hardware, and accessories.

In addition to our composite, all the materials used for the design of our sheds are of first quality and they all have the particularity of being able to last over time.

FIBERWOOD SHEDS – UNBEATABLE DESIGN

Leader in composite sheds, FIBERWOOD continues to innovate by offering you sheds that will meet and even exceed your expectations.

Available in various models, from simple storage to a secondary living space, our sheds will stand out first and foremost for their incomparable styles and designs, but also because our design teams have not overlooked anything in their designs.

SEE THE DIFFERENCE

One of the main advantages of FIBERWOOD composite sheds is their structure and solidity once they are assembled.

Designed to cope with our North American climatic conditions, our sheds will offer you peace of mind by their conception as well as the little maintenance they will require over time.

ROOF

- ✓ PVC + ASA panel - Heat resistant and perfectly waterproof and has a UV protection.
- ✓ Structure of the roof in high quality extruded aluminum.

CORNICE, GUTTER AND VENTILATION

- ✓ All our sheds are equipped with an extruded aluminum cornice directly on the roof structure to give a perfectly integrated fascia to your shed. Gutters and downspouts are included in all our models with the exception of the Mirage.
- ✓ All our sheds except Mirage are equipped with ventilation grilles to allow good air circulation inside the shed.

WALLS

- ✓ High quality aluminum structure.
- ✓ FIBERWOOD composite with PROSHIELD PREMIUM protection.
- ✓ Wall height from 78" to 120" depending on the model.
- ✓ High-caliber aluminum floor rail.
- ✓ U-shaped corner and H-structure crossbeam to reinforce walls and roof structure.

ALUMINUM DOORS

- ✓ High quality aluminum double doors and panels.
- ✓ All our doors are 79" high with threshold.
- ✓ All our doors are also equipped with anti-theft hinges with automatic closing for security and peace of mind.
- ✓ PVC weatherstripping.
- ✓ All handles have locks with keys.

WINDOWS

- ✓ High quality aluminum structure.
- ✓ Opening system on each window with lock for security.
- ✓ Tinted acrylic windows on our Mirage model and thermos glasses on all our other models.

MIRAGE

MIRAGE

When Modernism and Robustness Meet

With a Contemporary and Refined Style, the MIRAGE Shed is a Sure Hit.

Built to last, the Mirage has been designed very robustly. This shed features high quality FIBERWOOD and aluminum coextrusion composite, large double doors and abundant windows on 3 sides at the top of the shed.

Made to Last

Profiled beam in galvanized steel, roof in galvanized steel with powder coating, wall in coextrusion panel with our PROSHIELD PREMIUM protection, doors with aluminum frame with composite panel and PU steel and windows in PC sheets.

Composite boards with PROSHIELD PREMIUM protection:

- ✓ Resists rot and mildew;
- ✓ Resistant to insect, fungus, shock and stains;
- ✓ Rot-proof boards therefore insensitive to humidity, rays and temperature changes.

This is one of the sturdiest shed on the market, withstanding snow loads up to 200 kg/m² on the roof.

The Mirage is offered with a full 20-year warranty and will last over time.

3 sizes available: This model is available in three sizes: 7' x 7', 9' x 7' and 11' x 7'. An ideal outdoor storage solution for all your garden tools and equipment, garden furniture, barbecues, bicycles, pool pump & accessories and much more!

Security: In terms of security, the MIRAGE is equipped with self-closing door hinges and a door lock with key.

Easy to Install and Maintain

Our FIBERWOOD sheds are all designed in a modular way, so no adjustment or cutting will be required.

With only simple tools, 2 workers can complete the assembly in half a day.

The installation of the shed must be done on a solid leveled base. Concrete slab, asphalt driveway, paving stone or slabs, wood or composite terrace, several options are available to you.

Our sheds are all delivered on pallets.

Bilingual assembly instructions are simple and clear.

Very easy to maintain: no oil, paint or stain is required over time.

20-year warranty on the composite boards and a 5-year warranty on the structure, hardware, and accessories.

MISTRAL

MISTRAL

Contemporary Skillion Roof Shed – A Must

Modern and contemporary, this skillion roof shed will fit perfectly into your outdoor layout. With its composite co-extrusion and high quality aluminum, large double thermos smoked glass doors, integrated gutters and impeccable finish, this shed will stand out in your yard.

In addition to its impeccable aesthetics, this shed boasts remarkable durability through its design and the use of high-quality materials.

Solid Structure and Materials that Stand the Test of Time

Built to last over time just like your home, our engineers have designed the Mistral to withstand our harsh North American climatic conditions.

Composite boards with PROSHIELD PREMIUM protection:

- ✓ Resists rot and mildew;
- ✓ Resistant to insects, fungi, shocks and stains;
- ✓ Rot-proof boards therefore insensitive to humidity, rays and temperature changes.

High quality aluminum procuring a solid metal that does not rust over time.

Premium modular design.

Security

As for the security component, we have equipped the MISTRAL with self-closing door hinges and door locks with key. Models with windows also have latches on each of them. The Mistral's thermos windows and doors are also made of tempered glass to avoid any possible injury if broken.

THE SCANDINAVIAN

THE SCANDINAVIAN

A Shed with a Gable Roof – A Classic

A redesigned classic, this 2-sided roof shed will bring beauty to any backyard while offering the most spacious and optimal storage space.

Like all our sheds, the SCANDINAVIAN is made of high quality FIBERWOOD coextrusion and aluminum composite. It has large smoked glass double doors and integrated gutters. The careful consideration of its aesthetics and finishing results in a shed that is visually appealing, while its strength is derived from meticulous design and the use of high-quality materials.

Solid Structure and Materials that Stand the Test of Time

Built to last over time just like your home, our engineers have designed the Scandinavian to withstand our harsh North American climatic conditions.

Composite boards with PROSHIELD PREMIUM protection:

- ✓ Resists rot and mildew;
- ✓ Resistant to insects, fungi, shocks and stains;
- ✓ Rot-proof boards therefore insensitive to humidity, rays and temperature changes.

High quality aluminum procuring a solid metal that does not rust over time.

Premium modular design.

Security

As for the security component, we have equipped the SCANDINAVIAN with self-closing door hinges and door locks with key. Models with windows also have latches on each of them. The Scandinavian's thermos windows are also made of tempered glass to avoid any possible injury if broken.

AN ENVIRONMENTALLY-FRIENDLY PRODUCT: OUR GOAL, OUR COMMITMENT

The perfect alliance between natural beauty and environmental commitment

Did you know that, according to statistics, approximately 1 million plastic bottles are consumed worldwide every minute? In the face of this alarming reality, finding sustainable solutions to reduce our ecological footprint has become more crucial than ever. Thankfully, our FIBERWOOD composite boards provide a tangible answer to this significant issue.

Made from 90% recycled wood and plastic particles, our FIBERWOOD composite boards offer an environmentally-friendly choice. By utilizing recycled materials, we effectively decrease the demand for virgin plastic and wood sourced from deforestation. Each FIBERWOOD board plays a part in reducing plastic waste and preserving our valuable forest resources.

What sets our eco-friendly product apart is not only its remarkable 90% recycling content but also its 100% recyclability. This means that when a FIBERWOOD board reaches the end of its lifespan, typically around 20 years, it can be transformed into new materials, preventing it from ending up in landfills and further minimizing our environmental impact.

Additionally, FIBERWOOD composite boards are free from harmful chemicals and Volatile Organic Compounds (VOCs). We prioritize providing a safe and healthy product, ensuring optimal indoor air quality and user well-being. With FIBERWOOD, you can create a living space or outdoor installation without concerns about adverse effects on your health or the environment.

Join us in our unwavering commitment to sustainability and environmental preservation. Make the conscious choice of FIBERWOOD and become part of the global movement towards a more eco-friendly lifestyle. Together, we can construct a better future—one board at a time.

RECYCLED AND RECYCLABLE ECO-FRIENDLY PRODUCTS

PROTECT OUR PLANET

Our commitment to our clients and the environment

WE ENHANCE YOUR OUTDOOR LIVING SPACES WHILE PROTECTING THEM.

-  Made with 90% recycled content
-  All components of FiberWood boards are 100% recyclable
-  Contains no harmful chemicals or VOCs
-  Does not contain virgin wood
-  Made with post-consumer recycled plastic and recycled eucalyptus
-  Wood fiber produced using a closed-loop manufacturing process that saves water and energy
